## Summary

---

Software Engineer with 2+ years of experience in **Java, Spring Boot, Apache Camel, and microservices architecture** within the **telecom domain**. Experienced in building high-throughput REST APIs, CI/CD automation using Jenkins, containerization with Docker, and deployment on Kubernetes/OpenShift. Strong focus on performance optimization, scalability, and Agile-driven delivery.

## Experience

---

AMDOCS DEVELOPMENT CENTER – Software Engineer

07/2023 – 07/2025

*XL Axiata*

*Pune, Maharashtra*

- Implemented third-party service integrations, improving internal external system communication.
- Designed testing and Camunda workflows, optimizing performance testing frameworks and increasing test execution speed by 5%.
- Collaborated on database optimization, reducing query response time by 10% and reducing fallouts.

*VODAFONE Germany*

- Developed applications using Java, Spring Boot, Angular, and REST APIs, resulting in 5% faster delivery.
- Optimized database queries, cutting report generation time by over 10% for performance enhancement and resource efficiency.
- Automated testing using TestNG, raising coverage from 60% to 90% ensuring robust test coverage.

*OPTIMA Philippines*

- Built and maintained Camel microservices handling 1M+ daily transactions, while implementing Jenkins-based CI/CD pipelines that reduced manual deployment efforts by 20%.
- Contributed to Agile Scrum ceremonies, client demos, and cross-functional code reviews to ensure high-quality and on-time delivery.

## Projects

---

NIT WARANGAL Summer School

01/2023 – 06/2023

- Implemented a robust algorithm utilizing the sort tandem repeat discrete Fourier transform (STR-DFT) using a suite of Python libraries such as NumPy and pandas.
- Developed a Mathematical model for diverse projects using advanced algorithms and tools, achieving accuracy rates exceeding 95%.

*MS-BUILDER*

- Developed a microservice builder that generates Spring Boot services from OpenAPI specifications.
- Enhanced the builder to auto-generate Spring REST APIs, Docker setup, deployment configurations, and Jenkins pipelines for end-to-end microservice delivery.

## SKILLS

---

- |                                          |                                       |
|------------------------------------------|---------------------------------------|
| • JAVA, Python, C++, C                   | • JUnit, Jenkins, Mockito, HTML, CSS  |
| • Spring Boot, Camel, Hibernate, Angular | • Git, Bitbucket, AWS, KAFKA          |
| • MySQL, Linux, Couchbase                | • REST API, Docker, Kubernetes, Maven |

## CERTIFICATES / ACHIEVEMENTS

---

- Certified in AWS Cloud Practitioner, Kubernetes for Beginners, and YAML: Zero to Master.
- Achieved AIR 177 in NIMCET, 4th place in NITW Hackathon, and Amdocs India Coding Champion.

## EDUCATION

---

Master of Computer Applications

Warangal, India

National Institute of Technology, Warangal

10/2020 – 07/2023
